

ICELAND - NORTHERN LIGHTS - 4N/5D

ITINERARY

Itinerary:

Day 1 : SUN: WELCOME TO ICELAND (50 km/31 mls)

The Flybus shuttle brings you from Keflavík International Airport to the accommodation in Reykjavík where you spend the night. We provide you with ideas how to explore Iceland's capital on your own, dinner suggestions too! Food lovers will be pleased and perhaps even impressed by the number of diverse restaurants in Reykjavík. Many award winning chefs create delicious Icelandic cuisine that is characterized by an imaginative use of local ingredients such as fresh seafood, organic lamb and wild game; but be sure to try the fabulous Icelandic hotdog and pizza too!

Day 2 : MON: THE GOLDEN CIRCLE ROUTE (220 km/136 mls)

At 08:30 meet your tour guide and start the escorted tour program with a short introduction to Icelandic geology while watching a striking film at the Reykjavik Volcano House documenting the eruptions of Eyjafjallajökull and Fimmvörðuháls in 2010, which caused millions of people to be stranded worldwide as thousands of flights were cancelled. These films give a good insight into the general geology and volcanology of Iceland. At the Volcano House you can experience a hands-on geological exhibition where you can examine various pieces of pumice, ash and lava from Icelandic volcanoes. Later on we depart from Reykjavik and drive to Thingvellir National Park, a UNESCO world heritage site, and where the Althingi, the oldest legislative assembly in the world was founded. This is one of Iceland's most fascinating places both geologically and for the role it plays in the country's history and sense of national identity. Thingvellir is also remarkable for reasons of natural science, as the site is part of a fissure zone running through Iceland, and is situated on the tectonic plate boundaries of the Mid-Atlantic Ridge. The faults and fissures of the area make evident the rifting of the earth's crust.

Exploring the hot springs at Geysir is like watching a geography lesson in real life: natural springs bubbling away in the ground until the pressure becomes too much - and they explode in spectacular style. Geysir and Strokkur are the two biggest of the geysers there. While Geysir is no longer active, Strokkur still spouts every 5 to 15 minutes to the delight of visitors. Next we travel to Gullfoss, "the golden falls", which is a double waterfall that tumbles 34 meters into the Hvítá river. Gullfoss is one of Iceland's most beautiful waterfalls. The explosion crater called Kerið is filled with water and resembles an ancient amphitheatre. In the evening, you hear about the Northern Lights from your tour guide. Naturally, once darkness falls, you are out in the garden waiting for the Northern Lights. We stay for one night in simple cottages in South Iceland.

Day 3 : TUE: VATNAJÖKULL NATIONAL PARK & GLACIER LAGOON (385 km/239 mls)

A long drive brings us to a world of glaciers, ice and icebergs. We travel to Jökulsárlón glacial lagoon filled with floating icebergs. We explore this extraordinary site and perhaps see some seals swimming in the arctic waters. You can walk on the black sandy beach where large icebergs get stranded. The Vatnajökull National Park is about 12,000 square kilometers and it is the largest National Park in Europe. In this area we find Iceland's highest mountains, an alpine environment and Europe's largest glacier. Tonight you can enjoy a movie presentation about Northern Lights as a part of the Northern Lights educational program. Be careful not to go to bed too soon in this remote and quiet location, or you may just miss out one more chance of seeing the Northern Lights shimmering and dancing across the night sky. We stay for one night at Fosshotel Núpar in the Vatnajökull region.

Day 4 : WED: SOUTH COAST (305 km/189 mls)

Today, we head across the Laki lava field to the village of Vík where we make a photo stop. We take a stroll on the black lava beach and along the bird cliffs at Reynisfjara beach in South Iceland. We pass the glacier Mýrdalsjökull and the infamous volcano Eyjafjallajökull and continue to Skógafoss waterfall which is 60 meters high and belongs to the most impressive waterfalls in the country. Further west we reach the high but narrow Seljalandsfoss waterfall which plunges over the mountain. There's a trail that goes behind the fall which is interesting - if you are prepared to get wet! In the evening you return to Reykjavik for one last night. An optional Northern Lights bus tour or fjord cruise can be booked on the spot, if the weather conditions are ideal. We stay for one night in Iceland's capital.

Day 5 : THU: DEPARTURE HOME (50 km/31 mls)

Individual transfer by Flybus airport shuttle from your guesthouse accommodation in Reykjavík to Keflavík Airport.

Daily driving:

Total mileage without airport transfer is 910 km (564 miles) which is an average of 303 km (188 miles) per day. You spend about 4 hours per day on the bus, depending on road conditions, traffic and daily distances. On some days the driving might be longer than on some other days.

CHANGE OF PROGRAM: Itineraries may be subject to change at short notice during severe weather conditions and certain outdoor activities/day trips may be cancelled during the winter season in Iceland. In these rare cases, where situations of force majeure apply, excursions/activities cannot be refunded but the local guides will try their best to find reasonable alternatives where and whenever possible.
