**IMPORTANT:**

This itinerary is a unique journey, designed and organised by the company South Greenland Expeditions. It keeps the adventure and discovery ingredients present in all our journeys. The route can be done as it is explained above or in reverse order. The order of the activities may not be exactly as planned in this outline. Greenland is the wildest country in the northern hemisphere, infrastructures are almost non-existent and logistics pose enormous challenges. That is the reason why we may not follow this daily itinerary exactly as planned. It is subject to change in order to adapt the journey to weather conditions, sea conditions, or technical and organisational difficulties, and it therefore requires flexibility from the traveller.
